PLEASE DESCRIBE THE TYPE OF WORK TO BE COMPLETED

(Be as detailed as possible to avoid having to provide additional information)

Provide a detailed description of the proposed project:

This project will permanently protect, under conservation easement, 38 acres and 2,200 feet of river frontage along middle Ohop Creek and plant and enhance the habitat quality of the riparian corridor. This stretch of Ohop Creek supports Chinook spawning areas and protection of this property will also allow for continued channel migration in this section of the Ohop valley, near Eatonville, Pierce County.

Some of the riparian corridor was replanted in 2006 by the Nisqually Indian Tribe under a 10-year voluntary landowner agreement. However, with channel migration and recent flooding it is evident that additional planting is needed and would further buffer the spawning areas with improved habitat. The landowner is amenable to the enhanced riparian buffers and would like to sell the conservation easement at a bargain to the Land Trust.

Describe existing project site conditions.

The property is currently used for haying and the some of the riparian area has been planted with trees

Describe any proposed ground disturbing activities. That is, will a tool(s) be used to move earth (soil, rock, gra

The only ground disturbing activites will be for tree planting and fence posts.

Will buildings be altered or demolished? If so please complete a DAHP Determination of Eligibility EZ2 form for each building affected by the proposed project and attach the form to your project in PRISM. <http://www.dahp.wa.gov/pages/Documents/Sites.htm>
